

AIBiol Annual Conference
EVOLUTION IN THE AUSTRALIAN BIOTA
 23rd – 25th September 2002

The Australian Institute of Biology will be holding its annual symposium at the University of Adelaide on **September 23-25 2002**. The theme of the conference will be:

Evolution in the Australian Biota -

- Morphological evidence (including palaeontology)
- Molecular evidence
- Adaptation to the Australian Environment

It is expected that registration will be approximately \$100, with a substantial discount for students and retired members. Daily registrations will also be available at a reduced price.

It is our intention to hold at least one half day session directed towards senior secondary school students and teachers, and we encourage feedback from members on the form this should take.

If you would like to register your interest in attending, please fill out the form below.

A second and final circular, including a registration form, will appear in early July. For people living outside Adelaide, we can organise accommodation according to your requirements.
